SAFETY DATA SHEET
UNIVERSAL FOREST PRODUCTS, INC.

1. Identification

Product identifier: ProWood® Preserved with CA-C

Other means of identification: End tag will be marked “CAC”, or “Copper Azole”

Synonyms: Copper Azole, Copper Azole type C

SDS number: UFP-CAC-1

Recommended use: Preservative Treated Wood for various interior and exterior applications.

Recommended restrictions: None known.

Manufacturer/Importer/Supplier/Distributor information

Company name: Universal Forest Products, Inc.
Address: 2801 E Beltline, NE, Grand Rapids, MI 40525
Telephone number: 616-365-1526
Contact person: Regulatory Compliance
Emergency phone number: CHEMTREC: 1-800-424-9300

E-mail: rdickens@ufpi.com

2. Hazard(s) identification

Physical hazards: Not classified.

Health hazards:
- Sensitization, skin Category 1
- Carcinogenicity (inhalation) Category 1A

OSHA defined hazards: Combustible dust

Label elements

Signal word: Danger

Hazard statement: May cause cancer by inhalation. May cause an allergic skin reaction. May form combustible dust concentrations in air.

Precautionary statement

Prevention: Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Prevent dust accumulation to minimize explosion hazard. Ground/bond container and receiving equipment. Wear protective gloves/protective clothing/eye protection/face protection. Contaminated work clothing must not be allowed out of the workplace. Wash thoroughly after handling. Observe good industrial hygiene practices.

Response: If exposed or concerned: Get medical advice/attention. If on skin: Wash with plenty of water. If skin irritation or rash occurs: Get medical advice/attention. Take off contaminated clothing and wash before reuse. In case of fire: Use CO2, foam or water spray for extinction.

Storage: Store away from incompatible materials.

Disposal: Dispose of contents/container in accordance with local/regional/national/international regulations.

Hazard(s) not otherwise classified (HNOC): None known.
3. Composition/information on ingredients

Composition comments

1. All concentrations are in percent by weight unless ingredient is a gas. Depending on the additives applied to the treating solution, this wood may also contain < 1% of a mold inhibitor and <1% of a non-hazardous wax emulsion. None of these ingredients are classified as carcinogens. Plywood supplied by others is bonded with various low formaldehyde emission bonding systems.

4. First-aid measures

**Inhalation**
Move to fresh air. If breathing is difficult, give oxygen. Get medical attention immediately. Some species may cause allergic respiratory reactions with asthma-like symptoms in sensitized individuals.

**Skin contact**
Remove contaminated clothing. Wash skin thoroughly with soap and water for several minutes. Prolonged contact with treated wood and/or treated wood dust, especially when freshly treated at the plant, may cause irritation to the skin. Abrasive handling or rubbing of the treated wood may increase skin irritation. Some wood species, regardless of treatment, may cause dermatitis or allergic skin reactions in sensitized individuals. If wood splinters are injected under the skin, get medical attention. In case of rashes, wounds or other skin disorders: Seek medical attention and bring along these instructions.

**Eye contact**
Do not rub eye. Immediately flush eye(s) with plenty of water. Remove any contact lenses and open eyelids wide apart. If eye irritation persists: Get medical advice/attention.

**Ingestion**
Rinse mouth thoroughly if dust is ingested. Get medical attention if any discomfort continues.

**Most important symptoms/effects, acute and delayed**
May cause allergic skin disorders in sensitive individuals. Wood dust: May cause nasal dryness, irritation and mucostasis. Coughing, wheezing, sneezing, sinusitis and prolonged colds have also been reported. Depending on wood species may cause respiratory sensitization and/or irritation. Symptoms can include irritation, redness, scratching of the cornea, and tearing. May cause eczema-like skin disorders (dermatitis). Airborne treated or untreated wood dust may cause nose, throat, or lung irritation and other respiratory effects.

**Indication of immediate medical attention and special treatment needed**
Treat symptomatically. Respiratory ailments and pre-existing skin conditions may be aggravated by exposure to wood dust.

**General information**
Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

**Suitable extinguishing media**
Carbon dioxide, regular foam, dry chemical, water spray, or water fog.

**Unsuitable extinguishing media**
Do not use water jet as an extinguisher, as this will spread the fire.

**Specific hazards arising from the chemical**
Depending on moisture content, and more importantly, particle diameter and airborne concentration, wood dust in a contained area may explode in the presence of an ignition source. Wood dust may similarly deflagrate (combustion without detonation like an explosion) if ignited in an open or loosely contained area. An airborne concentration of 40 grams (40,000 mg) of dust per cubic meter of air is often used as the LEL for wood dusts. Reference NFPA Standards- 654 and 664 for guidance.

**Special protective equipment and precautions for firefighters**
Self-contained breathing apparatus and full protective clothing must be worn in case of fire. Selection of respiratory protection for firefighting: follow the general fire precautions indicated in the workplace.

**Fire-fighting equipment/instructions**
Use water spray to cool fire exposed surfaces and to protect personnel.

**General fire hazards**
May form combustible dust concentrations in air.
6. Accidental release measures

Personal precautions, protective equipment and emergency procedures
Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area).
Avoid generation and spreading of dust. Avoid spread of dust. Avoid inhalation of dust.
Provide adequate ventilation. Wear appropriate personal protective equipment (See Section 8).

Methods and materials for containment and cleaning up
Sweep or vacuum up spillage and collect in suitable container for disposal. If not possible, gently moisten dust before it is collected with shovel, broom or the like. Containers must be labeled. For waste disposal, see Section 13 of the SDS.

Environmental precautions
For good industrial practice avoid release to the environment.

7. Handling and storage

Precautions for safe handling
Avoid prolonged or repeated breathing of dust. Avoid prolonged or repeated contact with skin. Wear appropriate personal protective equipment. Do not smoke. Change contaminated clothing. Persons susceptible for allergic reactions should not handle this product. Do not burn preserved wood. Do not use preserved wood as Mulch. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces.

Conditions for safe storage, including any incompatibilities
Keep away from heat, sparks and open flame. Store in tightly closed original container in a dry, cool and well-ventilated place. Store away from incompatible materials (See Section 10).

8. Exposure controls/personal protection

Occupational exposure limits

Biological limit values
No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls
Provide sufficient general/local exhaust ventilation to maintain inhalation exposures below current exposure limits and areas below explosive dust concentrations. Shower, hand and eye washing facilities near the workplace are recommended.

Individual protection measures, such as personal protective equipment

Eye/face protection
Wear safety glasses with side shields when handling, cutting, sanding or grinding this material.
Use a face shield during processes that may generate excessive dusts and splinters.

Skin protection
See Hand Protection

Hand protection
Wear chemical resistant (rubber, neoprene or nitrile) gloves when handling freshly treated wood at the treating plant. Otherwise, wear puncture resistant work gloves, such as leather.

Other
Wear long sleeve shirt, long pants and gloves when working with freshly treated wet wood.

Respiratory protection
If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn. Use a NIOSH–approved respirator if there is a potential for exposure to dust exceeding exposure limits (See 29 CRF 1910.134, respiratory protection standard).

Thermal hazards
Wear appropriate thermal protective clothing, when necessary.
General hygiene considerations

If wood dust contacts the skin, workers should wash the affected areas with soap and water. Clothing contaminated with wood dust should be removed, and provisions should be made for the safe removal of the chemical from the clothing. Persons laundering the clothes should be informed of the hazardous properties of wood dust. A worker who handles wood dust should thoroughly wash hands, forearms, and face with soap and water before eating, using tobacco products, using toilet facilities, applying cosmetics, or taking medication. Workers should not eat, drink, use tobacco products, apply cosmetics, or take medication in areas where wood dust is handled, or processed. Observe any medical surveillance requirements.

9. Physical and chemical properties

Appearance
- Physical state: Solid
- Form: Solid Wood Dust
- Color: Not available
- Odor: No odor
- Odor threshold: Not applicable
- pH: Not applicable
- Melting point/freezing point: Not applicable
- Initial boiling point and boiling range: Not applicable
- Flash Point: Not available
- Evaporation rate: Not applicable
- Flammability (solid, gas): Combustible dust

Upper/lower flammability or explosive limits
- Flammability limit - lower (%): Not available
- Flammability limit - upper (%): Not available
- Explosive limit - lower (%): Not available
- Explosive limit - upper (%): Not available

Vapor pressure: Not applicable
Vapor density: Not applicable
Relative density: Not available
Solubility(ies)
- Solubility (water): Not available
- Partition coefficient (n-octanol/water): Not applicable
- Auto-ignition temperature: Not available
- Decomposition temperature: Not available
Viscosity: Not applicable

10. Stability and reactivity

Reactivity
The product is non-reactive under normal conditions of use, storage and transport.

Chemical stability
Stable at normal conditions.

Possibility of hazardous reactions
Hazardous reactions do not occur.

Conditions to avoid
Avoid heat, sparks, open flames and other ignition sources. Minimize dust generation and accumulation. Avoid contact with incompatible materials.

Incompatible materials
Strong oxidizing agents. Reducing agents.

Hazardous decomposition products
Combustion products may yield irritating and toxic vapors/fumes of organic materials, and oxides of carbon and nitrogen.
11. Toxicological information

Information on likely routes of exposure

**Inhalation**
Wood dust, treated or untreated, is irritating to the nose, throat and lungs. Prolonged or repeated inhalation of wood dusts may cause respiratory irritation, recurrent bronchitis and prolonged colds. Some species may cause allergic respiratory reactions with asthma-like symptoms in sensitized individuals. Prolonged exposure to wood dusts by inhalation has been reported to be associated with nasal and paranasal cancer.

**Skin contact**
Handling may cause splinters. Prolonged contact with treated wood and/or treated wood dust, especially when freshly treated at the plant, may cause irritation to the skin. Abrasive handling or rubbing of the treated wood may increase skin irritation. Some wood species, regardless of treatment, may cause dermatitis or allergic skin reactions in sensitized individuals.

**Eye contact**
Dust may irritate the eyes.

**Ingestion**
Not likely, due to the form of the product. However, ingestion of dusts generated during working operations may cause nausea and vomiting. Certain species of wood and their dusts may contain natural toxins, which can have adverse effects in humans.

Symptoms related to the physical, chemical and toxicological characteristics
May cause allergic skin disorders in sensitive individuals. Wood dust: May cause nasal dryness, irritation and mucostasis. Coughing, wheezing, sneezing, sinusitis and prolonged colds have also been reported. Depending on wood species may cause respiratory sensitization and/or irritation. Symptoms can include irritation, redness, scratching of the cornea, and tearing. May cause eczema-like skin disorders (dermatitis). Airborne treated or untreated wood dust may cause nose, throat, or lung irritation and other respiratory effects.

Information on toxicological effects

**Acute toxicity**
Not expected to be acutely toxic.

**Skin corrosion/irritation**
Dust may irritate skin.

**Serious eye damage/eye irritation**
Dust may irritate the eyes.

**Respiratory or skin sensitization**

**ACGIH Sensitization**
Dermal sensitization. Respiratory sensitization.

**Respiratory sensitization**
Exposure to wood dusts can result in hypersensitivity.

**Skin sensitization**
May cause an allergic skin reaction. Exposure to wood dust can result in the development of contact dermatitis. The primary irritant dermatitis resulting from skin contact with wood dusts consist of erythema, blistering, and sometimes erosion and secondary infections occur.

**Germ cell mutagenicity**
No component of this product present at levels greater than or equal to 0.1% is identified as a mutagen by OSHA.

**Carcinogenicity**
May cause cancer by inhalation.
This classification is based on an increased incidence of nasal and paranasal cancers in

IARC Monographs. Overall Evaluation of Carcinogenicity
Wood Dust (CAS N/A) 1 Carcinogenic to humans.
NTP Report on Carcinogens
Wood Dust (CAS N/A)          Known To Be Human Carcinogen.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1050)
Not listed.

Reproductive toxicity  This product is not expected to cause reproductive or developmental effects.
Specific target organ toxicity - single exposure  Not classified.
Specific target organ toxicity - repeated exposure  Not classified.
Aspiration hazard  Not likely, due to the form of the product.
Chronic effects  Chronic exposure to wood dusts can result in pneumonitis, and coughing, wheezing, fever and the other signs and symptoms associated with chronic bronchitis.

Further information  Tebuconazole and propiconazole, components of NatureWood-CA Treated Wood, have been classified by EPA as possible human carcinogens. Acute toxicity testing has not been performed on the treated wood.

12. Ecological information

Ecotoxicity  The product is not classified as environmentally hazardous. This product is not expected to leach harmful amounts of preservative into the environment.

Persistence and degradability  No data is available on the degradability of this product.
Bioaccumulative potential  No data available on bioaccumulation.
Partition coefficient n-octanol / water (log Kow)  
| Propiconazole (CAS 60207-90-1) | 3.5                      |

Mobility in soil  The product is insoluble in water
Mobility in general  The product is not volatile but may be spread by dust-raising handling.
Other adverse effects  No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions  Dispose in accordance with applicable federal, state, and local regulations. Do not discharge into drains, water courses or onto the ground.
Local disposal regulations  Dispose in accordance with local regulations.
Hazardous waste code  The waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Waste from residues / unused products  Dispose in accordance with all applicable regulations. Do not discharge into drains, water courses or onto the ground.
Contaminated packaging  Since emptied containers may retain product residue, follow label warnings even after container is emptied.

14. Transport information

DOT  Not regulated as dangerous goods.
IATA  Not regulated as dangerous goods.
IMDG  Not regulated as dangerous goods.

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code  Not applicable.
15. Regulatory information
